Tips and Tricks
Items drawn from Applicad's Customer Service file

Number: 19
Objective: Simple Second Storey Roof
Commands used: Gable ends

Shown above, is the roof outline we are trying to achieve. The hip on the internal corner is at a lower eave height.
To achieve this we simply draw up our second storey roof as below.
Snap Here

From here go back to **Gen-Roof | Track-Outline**. When the crosshairs appear, "**Snap**" (Middle Mouse button or Shift + Left click) on the internal Corner shown. When the track outline box appears, track around a simple square shape, fill in the defaults as required and click **OK**.

***Sorcerer, Roof Magician and Roof Wizard.***

2-2000

These two
Lines

3-2000

1-2000

4-2000

When prompted for Gable ends select the two lines shown. When you select
these lines, they will flash, the first one will be a longer one, so select **NO**, a
shorter line will then flash. This is the wall line that we want so click **Yes**.
When you have selected both lines, right click the mouse and click **Yes** when
prompted to use "**These 2 Entities**". Say **NO** to the next two prompts and
your roof will be drawn up and completed, as below
